Product Information Sheet

54-2974 CANFORD SPARE CLIP For acoustic eartube

DESCRIPTION

A replacement/spare snap-ring coupler with integral clothing clip. The snap-ring coupler will mate with most earphone acoustic drivers including those from Canford and Telex. Suitable for use with acoustic eartubes that are supplied without a clothing clip but the application requires a secure mounting on the shirt or blouse of the talent/presenter.

NOTE: The 'stub' end of the snap-ring coupler that is inserted into the acoustic eartube will fit into both Canford and Telex eartubes. However, please be aware that the stub ends can vary in size.

If the acoustic eartube has been stretched by a larger 'stub' end of the coupler being replaced, then the expanded end of the acoustic eartube may need to be cut back to ensure secure fitting of the

Canford spare clip, (see illustrations below).
