Product Information Sheet

CANFORD LOW PROFILE IN-EAR HEADSET

54-2951 CANFORD IN-EAR HEADSET Single sided
54-2952 CANFORD IN-EAR HEADSET Dual sided

DESCRIPTION

These are generic, low-profile, lightweight, in-ear headsets, specifically designed for applications where the user may be exposed to higher noise-levels and where a lower visual impact is desired. They are available in both single and dual-sided formats, the single side one being designed for right side fitting so useful for camera operators.

They fit most ear profiles and are supplied complete with a set of all four sizes of Earportz eartips (small, medium, large and extra large), plus four sizes of helix tips, to achieve the best fit and stabilty. They are supplied unterminated. Canford offers a custom termination service according to users needs, if required.
