Height-adjustable monitor stand with table clamp for near-field monitors. The solid metal construction with the large support plate (205 x 245 mm) is suitable for a wide range of monitors and other equipment in the same size range. A practical table clamp allows it to be attached to tabletops with a thickness of 10 to 52 mm. The individual height adjustment is possible in 6 steps between 335 and 485 mm. In terms of load capacity, a centric load of up to 25 kg is possible. The support plate can be rotated 360° for perfect alignment. Rubber pads are included for secure, noise-insulating support of the monitors.
