

Nylon lacing cord formed as a slightly rounded mass of continuous filaments which when applied to harnesses, flattens, forms a tight knot, and will not penetrate insulations. Cord is waxed to provide excellent non-slip knots.

**Specifications**

Material	POLYAMIDE 6
Colour	Natural
Wax rate	30 - 35 %
Ultimate elongation	10 - 40 %
Drop point	76 - 84 °C
Breaking strain	23kg
Dimensions	1.3mm width x 0.5mm depth, approx. 500m on the bobbin
